# Rock Garden and Alpine Plants

Hardy Perennials  
Rare Flowering  
Trees and Shrubs  
Evergreens

WITTENBERG & CO.  
Nurseries  
Monmouth Road  
LONG BRANCH, NEW JERSEY  
TEL. EATONTOWN 293

## Order Early

Please order and plant early—if possible. Early planting is one of the greatest factors of success. Besides, in some of the rarer things stock is limited. Our prices are in line with the time; we are giving our customers the benefit of the lowest prices possible, and are giving every order our personal attention. Where quantities warrant and other sizes or other plants along our complete line of Evergreens, Shrubs, Trees, Perennials, Roses, etc., are needed, send us your list of plant material wanted and we will give especially attractive quotations.

*Six of one variety take the dozen rate.*

**WE GUARANTEE** that all our stock is of the first class quality, true to description and name, and that the plants ordered will reach you alive and in good condition. We will unhesitatingly refund all money remitted if the shipment does not meet with your unqualified approval. In the event of any reasonable cause for complaint when the plants have grown, the plants will be replaced, free of charge, with your next order.

Shipment will be made by express or, wherever possible, via parcel post.

***Please add 20c for Packing and Postage.***

Discount of 5% may be deducted on all cash orders received before April 15th.

Our Nursery is located on Monmouth Road, a highway running from Eatontown to West Long Branch, New Jersey.

If there is any information you would like to have regarding cultural advices and arrangements of planting your home garden, we are always glad to answer your questions.

# HARDY PERENNIALS

*AND*

## *Rock-Garden Plants*

*including Novelties and Scarce Varieties*

### Large Field-grown Plants of Guaranteed Quality

Perennials are the charming garden flowers that come back year after year without replanting, and a little care increases their beauty with each year's growth.

We are going to urge, if your space permits, that several plants of a sort be used in your garden rather than just one plant each of many kinds; you will be better pleased with the result if you use five or more plants of a kind together.

\*Items indicated with a star (\*) are suitable for Rock-Gardens.

Each Doz.

#### **ACHILLEA.** (Milfoil or Yarrow).

A. **Millefolium Roseum.** Rosy pink, dense heads, July to Oct. Stems 18 inches.
